

Operation of Switches

William Lucid 04/01/2023

Switch pin assignments:

Switch1Pin GPIO13 //Switch 1

Switch2Pin GPIO14 //Switch 2

Switch3Pin GPIO23 //Switch 3

1. **Red led only "ON":** Press briefly (pb) Switch 2 (GPIO14) twice, then pb Switch 1 (GPIO13) once. Repeat step if fails first time.

2a. **Entering Deep Sleep:** Must be interrupted when running "noMotion". Red and Blue leds, both "ON", pb Switch 3 (GPIO23) once, then pb Switch 1 (GPIO13) once or twice. Blue led will turn "OFF"

2b. **Wake up from Deep Sleep:** Press Switch 1 once; Serial Monitor will show start up details.

3. **Switching effects:** pb Switch 3 (GPIO23) once, then pb Switch 2 (GPIO14) twice. Motion function will start.
