

Operation of Switches

William Lucid

1. Only on power up; press briefly (pb) Switch 2 (GPIO14) twice, then pb Switch 1 (GPIO13) once.
2. Deep Sleep: Red and Blue both leds "ON", pb Switch 3 (GPIO23) once, then pb Switch 1 (GPIO13) once or twice. Blue led will turn "OFF"
3. Wake from Deep Sleep: Only Red led is "ON" pb Switch 2 (GPIO14), twice then pb Switch 1 (GPIO13) once, or twice or three times. Blue led will turn "ON."
4. Switching effects: pb Switch 3 (GPIO23) once, then pb Switch 2 (GPIO14) twice. Motion function will start.
