

Operation Five Switches:

William Lucid

Start/Pause: Apply power; Blue LED is "OFF". Press **Switch 1** (GPIO 13) once. Blue LED will be "ON"; next, press **Switch 5** (GPIO 27) this starts "noMotion," infinite loop.

Change: Switch from default, "noMotion" mode; press **Switch 3** (GPIO 23) once, wait for "Interrupt occurred" on screen; then press **Switch 2** (GPIO 14) once, "Motion" is displayed on screen. Wave "Chroma Wand" slowly, for URLs to be generated by MPU6050. Stationary "Chroma Wand," only one effect will repeat. Change to "noMotion" mode, pressing **Switch 3** (GPIO 23) once. Screen will display "noMotion".

Deep Sleep: press **Switch 3** (GPIO 23) once, wait for "Interrupt Occurred" to be displayed; then press **Switch 1** (GPIO 13) once. Blue LED goes "OFF".

Wake from Deep Sleep: Press **Switch 4** (GPIO 26) once; then press **Switch 1** (GPIO 13) once. Blue LED will be "ON"; next, press **Switch 5** (GPIO 27) this starts "noMotion," infinite loop.
