# Operation Four Switches:

William Lucid

**Apply power:** Blue LED is "OFF". Press **Switch 1** once. Blue LED will be "ON". Starts "noMotion" infinite loop.

**Switch from "noMotion":** press switch **Switch 3** once, wait for "Interrupt occurred" on screen; then press **Switch 2** once, "Motion" is displayed on screen. Wave pcb for URLs to be generated. If left stationary only one effect will repeat.

**Switch from "Motion":** Press **Switch 3** once, "noMotion" will be displayed.

**Deep Sleep:** press **Switch 3** once, wait for "Interrupt Occurred" to be displayed; then press **Switch 1** once. Blue LED goes "OFF".

**Wake from Deep Sleep:** Press **Switch 4** once; then press **Switch 1** once. Blue LED will be "ON". Default mode of operation is "noMotion"; will be running after waking from Deep Sleep.
